Manufacturer Specification

Technical Data

GSM: 850/900/1800/1900MHz;
GPRS: Class12, TCP/IP Build in GSM Module;
GPS: MT3326;
GSM Antenna: Built-in Quad Band;
GPS Antenna: Built-in GPS High Gain Ceramics Patch Antenna;
Tracking Sensitivity: -159dBm;
Acquisition Sensitivity: -144dBm;
Battery: 3.7VDC/450mAh;
Working Voltage/Current: 9-36VDC/90mA;
LED Indicator: 3 LED Indicator: GPS-Blue, GSM-Green, Power-Red;
Certifications: E-mark, CE.

Packaging Details

Package Type: Foam Packaging with Gift Box;

Package Weight: 1.87kg;
Dimensions: 98.0(L) * 52.0 (W) * 15.0 (H)mm.

GPS Vehicles Tracking System Feature Functions

NEW VT-220

Vehicle Tracking System

Engine Cut Off GPS Locator

Notice: Cut off the engine of the car when driving is very dangerous, Please be careful consideration before connect this plug.

GPS Tracking

SOS Alarm and burglar alarm.

Caution: GSM SIM Card is Indeed.

Alarm after being attacked

Monitor in-car situation by Phone

Check Location via SMS

GPS Tracking

Make use of GPS (Global Positioning System) technology to trace the exactly location of vehicles. To achieve tracing function, a GSM SIM card is indeed. Command sent by message control the in car gps tacker unit, then the unit return precise location latitude and longitude by message to smartphone or cellphone, for classical cellphone, only message with location of the cars and location latitude, for smartphone control, both message info and Google map link is available.

SOS Alarm and Burglar Alarm

In emergent case, press SOS for 3s to activate SOS alarm. Then the device will send SOS SMS to preset specific numbers and the dial the numbers in circles until the call is picked up. At the meantime, the gps tracker will upload SOS alarm data to the server.

Low Battery Alarm

When the vehicle tracking system is only working with battery, once the internal voltage of battery is less than 3.7V. The tracking system for vehicle will send low battery alarm sms to specific number and alarm on platform. Low battery alarm sms content example: " Attention!!!! Battery too low, please charge." Which means the battery is too low, time to charge.

Vibration Alarm

When vehicle power is off, ACC status is also low, and if the lead time of low ACC is more than 10 minutes (settable), the vehicle tracking system will activate security alarm. When the security alarm is on, once the vehicle vibrates for several times, the alarm will be activated, in the later 3 minutes, vehicle power is still off(ACC status is low, the vehicles tracker will start alarm. At this time, it will send alarm SMS to SOS specific number and dial the SOS number in cycle until through. If nobody answers, the call just keeps 3 loops at most.

Voice Monitoring

When the special number cellphone dial the vehicle tracker, ringing for 10 seconds, it will enter voice monitoring status. At this time, caller can monitoring the sound in vehicle. Incoming call from non special number will not activate voice monitoring function. Note: To realize this function, please set special number beforehand. The SIM card put into the vehicle tracking system should be equipped with caller identification.
